## SUMMARY

A **Java Full Stack Developer** with hands-on experience in Java, Spring Boot and Object-Oriented Programming principles, skilled in developing scalable and responsive web applications using both frontend and backend technologies. Proficient in integrating APIs managing databases and collaborating with cross-functional teams in an agile environment while adhering to best practice such as version control and documentation . focused on enhancing user experience and drive efficiency.

## EXPERIENCE

### Ai Variant | Java Full Stack Developer Intern

Bengaluru | 02/2024 - 05/2024

- Deployed backend services using Java and Spring Boot , creating Scalable **RESTful APIs** and implementing JWT-based authentication to enhance data security and integrity.
- Optimized front-end performance using React js , JavaScript , delivering an intuitive and responsive user experience
- Improved System Performance by optimizing database queries achieving a 15% increase in response speed and overall application reliability.
- Collaborated with cross-functional teams in an Agile environment, utilizing JUnit for comprehensive testing throughout the software development lifecycle (SDLC).

## PROJECTS

### Kreffer - Blog Application

[Live](#) | [GitHub](#)

- Developed a scalable RESTful web application using Java 8 and Spring Boot, improving response time and resource efficiency, Used database queries with Spring Data JPA and MySQL, reducing data retrieval time by 30%.
- Implemented advanced category and tag-based filtering, increasing content discoverability and user engagement by 35%.
- Engineered a content management system enabling users to publish, refine, and manage blog posts while fostering engagement through likes and comments.
- Secured authentication with JWT, Spring Security, preventing unauthorized access and ensuring data protection compliance.
- Deployed on AWS (EC2, S3, RDS) with auto-scaling, maintaining 99.9% uptime and handling peak loads efficiently.

### Memes

[Live](#) | [GitHub](#)

- Developed a dynamic and interactive Memes Generator using **React.js**, **Tailwind CSS**, HTML, CSS, allowing users to fetch memes via random selection or keyword-based searches for a personalized experience.
- Integrated third-party APIs and optimized API calls using JavaScript and Fetch API to ensure real-time meme fetching with minimal latency, enhancing performance and responsiveness.
- Designed a fully responsive UI with Tailwind CSS and implemented error handling, ensuring a seamless experience across different devices and network conditions.
- Implement a copy-to-clipboard feature, loading indicators, and smooth UI updates using React Hooks (useState, useEffect) to enable easy meme sharing and improved user feedback on API requests.

## EDUCATION

### Government Engineering College, Banswara

Rajasthan

Bachelor of Technology in Computer Science and Engineering - 7.4 CGPA

2019-2023

### S V M Se. Sec. School, Phulera

Rajasthan

Senior Secondary (Science)

2018-2019

## SKILLS

Programming Language: Java 8 , JavaScript, SQL, Object-Oriented Programming,

Framework: SpringBoot, Spring MVC, Hibernate, JUnit, React js.

Web Technologies: Servlets, JSP, HTML5, CSS3, Tailwind CSS, REST API.

Tools: Git, Maven, VS Code, GitHub, MySQL (DataBase) .

Additional Courses: DSA, Full Stack Java Development
